

## Samplify

g-> start sample at last cue point

h-> stop current sample

left click on sample thumbnail -> play sample from beginning

right click on sample thumbnail-> play sample starting at selected point in sample

## Tag Explorer

drag tags to add to sample

click tags to search for samples containing tag

New Tags: Tags not currently added to any samples, recently created

Contained Tags: Tags that contain search term that have some sample in the current scope containing the tag

Not Contained Tag: Tags that contain search term that do not have a sample containing the tag in the current scope, but samples outside the scope do contain them.

Directory Explorer: Sets the scope of the current samples shown in the sample explorer. All Files that are in the folder or in a subfolder of the selected folder are added to the main sample explorer collection.
